Engineer Brand

About us

Engineer ApS is a Copenhagen software and IT consultancy, established 2025.

> This is the brand address. What follows is about Engineer ApS as a whole, whose main trade is engineering; the work shown here is the design and the marketing.

Engineer ApS is a software and IT consultancy in Copenhagen, founded in 2025. We design, build and operate the systems companies depend on — platform and backend engineering, data and databases, cloud and DevOps, and the quiet, dependable IT support that keeps everything running.

Behind it is Ditte Daryna Sh, who founded Engineer ApS after two decades of building and operating business systems.

How we work

You know who is responsible for delivery: we name them in your agreement. We agree the scope and price before starting, explain any specialist involvement and remain responsible for the work. The terms and service levels describe ownership, defect correction and handover, including what happens when ongoing work ends.

Our approach is straightforward: understand the problem, build something solid, and stand behind it. We favour durable solutions over quick fixes, clarity over cleverness, and long relationships over one-off deliverables.

Our work and experience

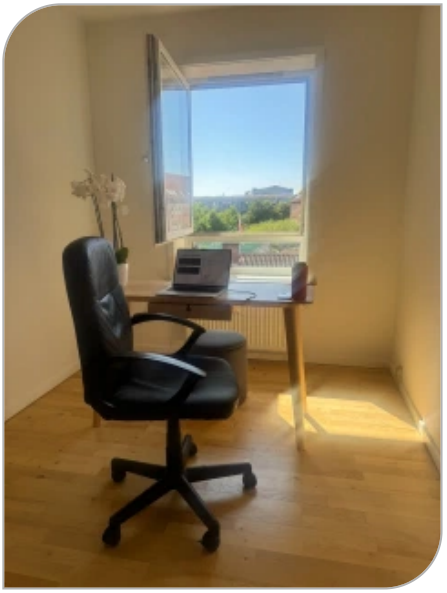

This website is our portfolio. Every achievement links to the work behind it and to the services it demonstrates — so the record, not the pitch, speaks for the company.

Engineer ApS was registered in 2025. Most of the work shown here was delivered before that by our founder inside client teams; some has been delivered by the company itself, and some since in employment. The same hands and the same standards — we say which is which rather than blurring it.

Our working setup at home in Copenhagen

If that sounds like the way you would want it built, start the conversation.

Engineering with clear responsibilities

Work with engineers who connect the technical decisions to your organisation's goals.
